15 PARTICULARLY CRAZY FACTS ABOUT YOUR MOUTH & TEETH

Your tongue is the only muscle that works without any support from the skeleton

inches

is the average tongue length

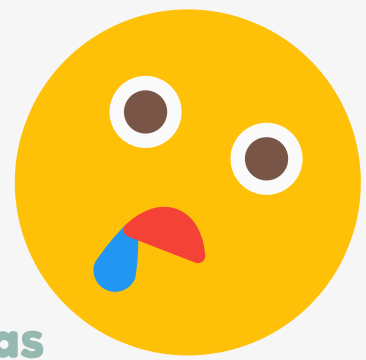

inches

is the length of the longest tongue recorded

Without SALIVA you wouldn't be able to taste anything...

...The inside of your mouth contains as many bacteria as there are people on Earth

Most people who are right handed tend to chew on their RIGHT side. Most who are left handed, tend to chew on their LEFT side.

You produce about a quart of saliva every day...

It's true most taste buds are on your TONGUE but you also have taste buds:

- In the back of your throat
- On your epiglottis (that flap in the mouth at the back of the tongue)
- Your nose
- In your sinuses
- Down the throat to your upper esophagus

Just as finger prints are unique, TOOTH prints are unique for everyone

A tooth that gets knocked out will begin to die within 15 minutes!

Teeth, like your bones, are alive! They have their own blood supply and nerves.

Your mouth is home to 300 types of bacteria

385

is the number of days we spend brushing our teeth over a lifetime

...One third of each tooth is beneath the gums

the average male smiles 8 times a day

the average female smiles 62 times a day
